

(San Diego, CA – February 2008) -- Mission Technology Group, Inc dba MAGMA a leading provider of PCI and PCI Express expansion solutions has appointed Sunshine Telesoft Limited an APAC distributor of MAGMA PCI Expansion systems for integration with Ai-Logix and Dialogic boards.

The MAGMA PCI Expansion systems allows one to add up to thirteen PCI cards through one PCI or PCI Express slot on a host computer or server. Sunshine Telesoft Limited as built their core business with the distribution of Ai-Logix and Dialogic boards. Adding the MAGMA PCI Expansion systems to their product line will allow them to increase the amount of I/O that is limited greatly by the amount of PCI or PCI Express slots in the host computer.

“This approach will allow Magma to work through focused distribution in key markets with established distributors, such as Sunshine Telesoft Limited” says Randy Jones, President and CEO of Magma, “Sunshine Telesoft Limited offers exactly the focus that we need.”

MAGMA Product benefits include:

- Easy Plug and Play installation
- PCI and PCI Express host card provides easy connection to desktop computers and servers
- Includes 1-meter expansion cable (optional 1.5-meter cable available)
- All slots support full-length or shorter universal and legacy 5 volt only PCI cards
- 4U, rugged black rack-mount enclosure
- Offers a consistent PCI configuration allowing easy host computer upgrades
- Patented technology provides low latency and high through-put
- Proven method to increase PCI capability without losing performance
- Auto-Switching 400W or Hot-Swappable Redundant Power Supply
- Surveillance Pro 2 provides failure alert via email or web browser (P13RR-TEL)
- Supports SNMP, enabling monitoring using standard MIB (P13RR-TEL)
- Dedicated fans for cooling PCI cards
- Optional drive cage for mounting up to eight internal drives inside chassis
- Optional Chassis Trak® rack slide kit for rack cabinet installation
- CE certified and FCC Class A verified
- Supported OS: Windows Vista/XP/2000/Server 2003, Mac OS 10.5.+, Linux Kernel 2.6x+

Mission Technology Group’s MAGMA brand is the leading provider of PCI and PCI Express Expansion Systems for several industries and provides innovative expansion solutions to original equipment manufacturers (OEMs), resellers and end-users in more than 45 countries. MAGMA PCI and PCI Express Expansion Systems provide a high-performance and low latency solutions for expanding standard PCI and PCI Express connectivity outside the computer.
